————— To create a more friendly storage space

Luoyang Luokeye Furniture Co., Ltd

METAL STORAGE

Modern office and home space are turning to more productive and active scenes, which means that the storage system is not only a simple functional object, but also a more natural and energetic atmosphere. Although paperless is the trend at present, the working and living environment is still in high demand for storage, which realizes the classified storage of various materials and articles, and also plays a role in meeting the space division.

With the development, people not only pay more and more attention to simplicity and convenience, but also pursue the coexistence of functionality and aesthetics. In order to solve the problem that traditional wooden cabinets are prone to damp and rot, wear-resistant and durable steel cabinets came into being. The steel cabinets are exquisite in workmanship, perfect in function, standard in size and a large number of detachable structures, which are ready for future expansion.

QUALITY IS THE FIRST PURSUIT

We have been engaged in the steel cabinet industry for many years, and have our own R&D team and factory workshop. We have been committed to producing better products. The newly developed Qiaoxuan series steel cabinets are more exquisite in workmanship and more reliable in quality. It has wooden transferr surface and various classic colors to choose, and this series can also support the customization of various steel products according to customer requirements to meet the needs of more functional scenes.

Options:

Finished product procurement
Exclusive custom

Sturdy and Durable

High-quality cold-rolled steel plate is selected as the production material, which is very stable and durable with almost invisible maintenance rate.

High product performance

Steel cabinets have the characteristics of fire resistance, stability, environmental protection and long service life. It can be used in harsh environments with special purposes.

Powerful storage function

The large space inside can store more documents, and different spaces have adaptive storage cabinet systems.

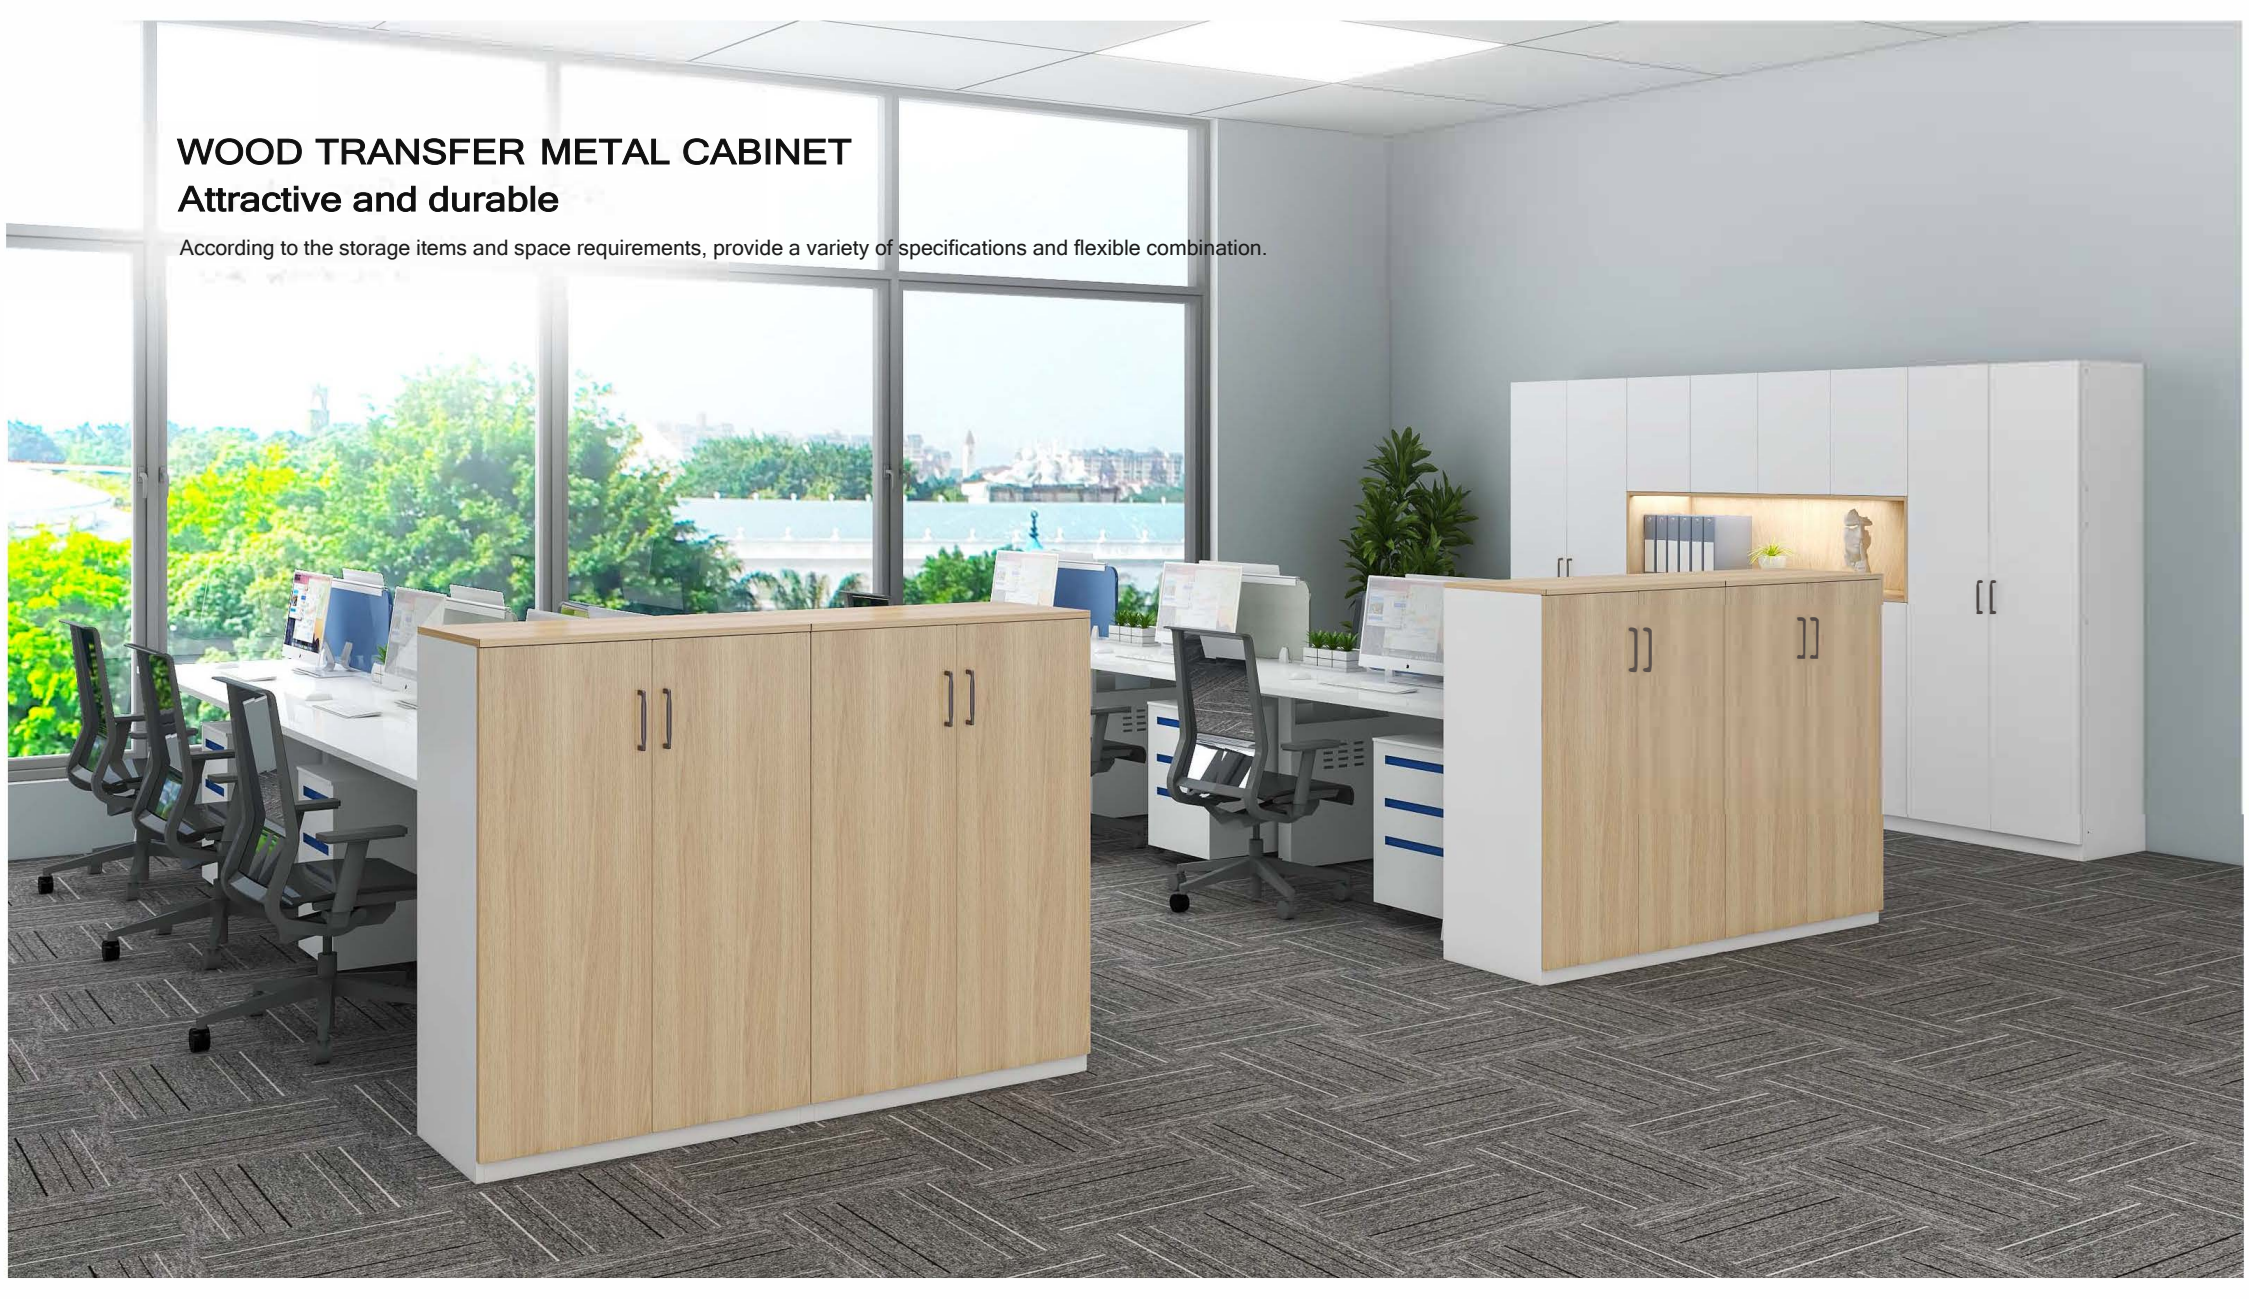

Safety and environmental protection

The steel raw materials used are environmentally friendly recyclable. The production workshop are safety and cleanliness, environmental protection and pollution-free.

WOOD TRANSFER METAL CABINET

Attractive and durable

According to the storage items and space requirements, provide a variety of specifications and flexible combination.

High filing cabinet combination

The combination of filing cabinets has powerful storage functions and various forms. The combination of textured metal door handles and push-open doors makes the overall shape more concise. The combination of closed cabinet and open space meets different storage requirements.

The space is equipped with an embedded hidden light strip, which is integrated in appearance and can light up the storage area, giving consideration to lighting and beauty.

METAL STORAGES

Combination of rigidity and softness, simplicity and fashion

At present, simplicity is the household style that consumers like, and the intuitive feeling of steel furniture is simplicity, which not only has a quiet and elegant appearance, but also emphasizes the maximum utilization of space in practicality. Compared with ordinary wood furniture, steel furniture is superior in quality and service life. Ordinary wood furniture is easy to be damaged, deformed, inconvenient to disassemble and maintain, and it is even more difficult to design and adjust the structure at will. Steel furniture makes up for these shortcomings, which is not only more simple and beautiful in appearance, but also has the characteristics of firmness, durability and convenient disassembly.

WOOD TRANSFER METAL CABINET

Natural Style

Wardrobe

Steel-made simple modern wardrobe, classic wood grain transfer effect, makes the home look brand-new, the clothes hanging area and storage drawer are reasonably divided, and the overall shape is more simple and fashionable by pressing and opening the cupboard door with better integration effect.
